EV Smart design, install and manage
EV charge points for commercial, public
sector and private land

ABOUT US

GET TO KNOW US EV CHARGE POINT OPERATORS

We are committed to building the smartest, fastest and most convenient way to charge your electric vehicle, all underpinned by the most comprehensive charge point management infrastructure in the market today. We have simplified the way you charge your car, just pull up, sign up and charge.

Where possible we will encourage our charge point locations to sign up to green energy suppliers because we are committed in doing our part to protect our planet for future generations.

**AT EV SMART WE AIM TO PROVIDE A FASTER,
EASIER AND SMARTER EV EXPERIENCE**

RE-CHARGE TO NETWORK

We are looking to acquire land with the following qualities to expand EV SMART'S Recharge Network.

Sites situated on highly transient and urban commuter routes nationwide

Sites between 0.5 – 2+ acres

Sites in prominent roadside locations

Standalone sites or sites forming part of larger developments

WHAT WE INCLUDE

What do we offer in return?

Freehold or leasehold structuring (minimum 20-year lease term to 5AI covenant)

Flexible solutions to meet individual site requirements

Highly competitive market terms/competitive fees

Standalone sites or sites forming part of larger developments

All planning, development, infrastructure and maintenance costs managed and paid by us

Increased footfall and dwell time to existing/adjacent developments
